

The toolbox supporting the book:

Lars Wanhammar: Analog Filters Using MATLAB, Springer, 2009.

The Authors hereby grants you a world-wide, royalty-free, non-exclusive license, subject to third party intellectual property claims:

- 🍏 to use, reproduce, modify, display, perform, sublicense and distribute all or any portion of the source code or binary form of this software or related data with or without modifications, or as part of a larger work; and
- 🍏 to utilize all or any portion of the source code or binary form of this software or related data.

In return you agree to the following conditions:

- 🍏 If you redistribute all or any portion of the source code of this software or related data, it must retain the above copyright notice and this license and disclaimer.
- 🍏 If you redistribute all or any portion of this code in binary form, you must include the above copyright notice and this license and disclaimer in the documentation and/or other materials provided with the distribution.
- 🍏 If you publish research results derived through the use of all or any portion of this software or related data, you must also acknowledge the use of this software in print in the body of your publication, unless your publication is two pages in length or less in published form.
- 🍏 If you distribute or publish modifications to all or any portion of this software or related data, or produce a product for sale or for license which includes all or any portion of this software, you are kindly asked to inform the authors of this product.
